

Egor Sorokin

Lead Designer – branding, visual systems, automation

I specialize in systemic design work: branding and identity, visual campaigns, prepress, web design, complex presentations, and design systems. I bring AI and automation into the process. Six years on the international team at Acronis. I don't just produce layouts — I build the processes around them.

18 years of experience · Russia / remote · RU · EN B2 · DE A2

IN BRIEF

01

End-to-end

Branding, web, print, 3D, motion, environmental design. I brief, design, present, and see projects through to production.

Complex design

UX/UI and design systems; 40+ slide presentations with structure and narrative.

Systems architecture

Component libraries and templates used by design, marketing, sales, and regional teams.

Visual campaigns

Key visuals for 50+ global events: from the key visual to banner ecosystems and brand books.

AI & automation

I bring neural networks into the workflow and write scripts and plugins to free the team from routine.

Knowledge sharing

I've mentored designers, run workshops, and shaped how tasks are scoped. I write a professional blog.

OPEN TO ROLES

02

- Lead Designer / Senior
- Art Director
- Design Lead · Product
- Design Lead · Marketing

Russian and international teams. Office, hybrid, or remote.

2008 — present

Freelance

Designer · Art Director

Independent practice — branding, web design, print

I run projects end to end: briefing, planning, design, maintaining the visual style, and product design.

- 01 I cover the manager, copywriter, and designer roles — working directly with the client, with no middleman.
- 02 I write specifications and oversee the work of front-end and back-end developers.
- 03 I support each project from the first brief through launch and ongoing maintenance.

Aug 2024 — Apr 2026

Simushka

Senior Designer

Russia · simushka.ru

Owned graphic production within the brand design team: banners, presentations, promo materials, packaging, and print. In parallel, I built out the processes.

- 01 Moved production into Figma and built a project system — the team stopped wasting time hunting for source files.
- 02 Introduced AI-generated product visuals — removed the need for costly photoshoots while keeping the quality.
- 03 Set up a presentation workflow in Figma: build speed increased fivefold.
- 04 Built a template system for sales reps across 12 regions — managers update dates and addresses themselves without touching the design.

Mar 2018 — Jun 2024

Acronis

Senior Designer / Art Director

Switzerland · acronis.com

Six years at an international B2B tech company. On the web design team: visual campaigns, banner ecosystems, presentations, and key visuals for product launches.

- 01 Developed visual campaigns and promo materials for 50+ international events.
- 02 Created a scalable component system for banners — a single set expanded to 15+ formats with no manual reworking.
- 03 Brought AI and 3D into the illustration process — cut production time for complex visuals several times over.
- 04 Wrote scripts for Figma and Photoshop that automated routine operations.
- 05 Mentored mid-level designers: assigned tasks, reviewed layouts, and raised the team's level.
- 06 Set up a task-management system in Jira and trained managers — reduced the number of iterations caused by unclear specs.

May 2016 — Aug 2023

Plusmedia · Lider Poiska

Lead Designer

Samara · plusmedia.ru · liderpoiska.ru

Full-cycle design projects in the SEO and web division: from analyzing the brief and discussing it with the client to final layouts and overseeing development.

- 01 Managed projects on my own — from brief to delivery, with no intermediate manager.
- 02 Created a design guide for the studio — standardized processes and raised the level of junior designers.
- 03 Worked with content without a copywriter: analyzed the material, rewrote it, and structured the text to fit the design.

DESIGN

Figma (since v1, I write scripts) · Adobe Photoshop, Illustrator, InDesign · After Effects

3D & VISUALIZATION

Blender · Cinema 4D (Octane, Arnold) · Unreal Engine (basics)

AUTOMATION

Figma scripts · Photoshop Actions & Scripts · HTML / CSS / JS — markup built for the task

AI TOOLS

Midjourney, Nanobanana, Firefly, Kling — visual generation · ChatGPT, Claude, Gemini — working with material · Codex — automation and vibe-coding

HOW I WORK

Systemic work

Areas where it's not only the visual idea that matters, but the logic, the architecture, and the reproducibility of the result.

- Complex 40+ slide presentations: a visual narrative, not just decoration.
- Prepress: I know where defects arise and how to prevent them.
- Design systems and templates for adjacent teams — marketing, sales.
- Branding and visual campaigns: concept brainstorming and consistent application.

Editing & copy

I completed Maxim Ilyahov's "Write, Shorten" course and apply the principles of plain, information-first style. Without a copywriter, I structure the client's material: I isolate the key points, rewrite them, and weave them into the design.

Management & communication

- Experience leading a team of up to 5 as art director and coordinator.
- I present and defend work in person to clients and stakeholders.
- I write a professional blog and share scripts and techniques with colleagues.
- A systematic approach: I break work into stages and flag risks in advance.
- I work comfortably in the office, hybrid, or fully remote.

Languages

Russian — native. English — B2 (I read documentation, handle correspondence, and take part in international team discussions). German — A2.
